

Progress Report #10
Avena Bridge Repair and Certification Project
August 29, 2026

On August 3, 2026, Mark Braun and Associates (MBA) received the redlined corrections from the County Department of Public Works. It is a 40 page document, consisting of two pages of bridge drawings, and 38 pages of calculations.

You may review the County's redlines by following this link:

<https://acrobat.adobe.com/id/urn:aaid:sc:VA6C2:fa0944e7-6b3a-4a35-a5fc-278818019481>

Please be advised that the Road Committee has already requested a change to the title of the drawing, which reads "COUNTY MAINTAIN BRIDGE".

We requested they change it to **CSA 41 Bridge Repair and Certification**

On August 27, 2026, MBA re-submitted the plans and calculations to the County, having addressed all of the redline concerns. You may review the re-submitted design work and calculations by following this link:

<http://csa41.org/wp-content/uploads/2026/09/AVENA-bridge-8-26-26-completed-county-comments.pdf>

There will be another review process of the re-submittal by County Public Works. If there are no further corrections, MBA will submit the plans to Santa Barbara County Building Dept. for a Building Permit and possibly a Land Use Permit.
